

Koneshweran Vishnu

I am an energetic and enthusiastic person who willing to accept challenges and achieving personal goals. My present career aim is to work within IT because I enjoy working with computers, I enjoy the environment and I find the work interesting and satisfying. The opportunity to learn new skills and work with new technologies is particularly attractive to me.

Main task here was to develop an End to End test framework on java for MillenniumCCP. Worked on selenium Test framework developing.

Technologies – Java, Selenium, JBehave, Bamboo, Jira, unit

Projects

ShinyApp

July 2020

Shiny is a cleaning service serving residential house-hold and apartments, small companies and boutiques in Stockholm. It is mobile app platform, which is very user friendly and have easy access platform. I developed complete mobile platform for user and cleaning partner. The mobile app enables user to book the cleaners for their needs and track the bookings and same mobile platform use for cleaning partners to check there assigned bookings details, earnings and ext.

Technology: Flutter, Android, iOS, Firebase, Node, Express, Cloud Function, Fastlane (CICD)

Grace of the lord Church App

August 2020

Grace of the lord App is developed for GOTL ministry church in Sweden. The App enables to interact with church devotees and church administers. The admins and users are interacting with same app with role base authentications.

Technology: Flutter, Android, iOS, Firebase, Node, Express, Cloud Function, Fastlane (CICD)

Technical Skills

Languages

Framework

OS Windows

DBMS Packages

Web designing

IDE

Libraries

Cloud platforms

Java, PHP, JavaScript, AngularJs, ReactJs, Typescripts, html5, python, Dart, Ionic, Cordova, Flask, drop wizard, rest-assure, Spring-Boot, ansible, Flutter, Express Windows 7, 8, 10, Linux, MacOS
MS SQL, MySQL, Oracle, Firebase, MongoDB
HTML, CSS, JavaScript
Visual Studio, Eclipse, Net Beans, Visual code, PyCharm, Idea
OpenCV, Open face, Machine learning, Kera's, TensorFlow, Dlib, ,Pandas, Numpy
AWS, Google Cloud, BigQuery, FireBase, AWS Amplify

Academic qualifications

Dalarna University Sweden

Master's in Data Science

Graduate 2022

Knowledges: Grammar of Graphics, Regression Model, Classification Model, Clustering, etc.

Projects: Case study on CSR report by industries working on Construction Material sectors (R Programming, GGplot2)

B.Sc. Special (Hons) – Information Technology

Graduated 2018

Specialization – Software Engineering

Sri Lanka Institute of Information Technology

Research project

Third Eye (Smart surveillance gadget)

Research project

Feb 2017 – November 2017

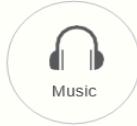

Third-Eye: A hand held Real time smart surveillance system combined with Raspberry Pi, which can offer many features more than a CCTV does. The device will observe the behavioral of each person and while observing the surrounding from the camera lenses It can understand the situations. When an abnormal behavioral or situation detected the system will notify the user.

Technology: Python, OpenCV, deep learning, Flask, angular, Html5, bootstrap

Hobbies & Interests

Cinema

Music

Videogames

Theatre

Travelling
